## 1. .another way to think about is having "motins" and "actions".

### 1.1. motions: eg:

- w - move onoe word forward
- b - move to the beging of the word
- and h,j,k,l, etc

### 1.2. Actions: eg:

- d - delete
- e - insert

### 1.3. then you can combined them to make more motions:

- dw - deletet word
- db - delete to the begining of word
- ew - edit word

### 1.4. and with ajectives:

- diw - delete inside word
- eiw - edti inside word
- ei( - edit inside parans
- ei{ - edit insde curly brace
- eit - edit inside tags
- the list goes on :)

### 1.5. there are more motions though, like,

- f - find char
- F - find char backwards
- (then , ; to go back and forth them)
- 0 - go to the beining of line
- \$ - go to the end of line
